Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-42 are, drawn to Power converter with conduction of rectifier device, classified in class 363, subclass 84.
- II. Claims 45-79 are, drawn to Power converter or method for driving synchronous rectifier, classified in class 363, subclass 21.06.
- III. Claim 80 is, drawn to a converter that provides a bias power supply, classified in class 363, subclass 21.01.
- IV. Claims 81-82 are, drawn to maximum duty cycle for a pulse width modulator, classified in class 363, subclass 21.11.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions a power converter with conduction of rectifier device, power converter or method for driving synchronous rectifier, a converter that provides a bias power supply and to maximum duty cycle for a pulse width modulator.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2838

4. Because these inventions are distinct for the reasons given above and the search required for Group I, II and III are not required for Group IV, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
